

Always Make A Great Entrance

Therma-Tru® Door Systems

A Welcome Sight

Home begins at the door. The door greets friends and protects family. But the purpose of a door runs deeper. As an entryway, it makes a lasting impression of beauty; as a well-designed system, it provides security, efficiency and confidence. It's no wonder that homeowners can be so passionate about their doors. Therma-Tru® takes your choice of door as seriously as you do. We have dedicated ourselves to reflecting inspiration and passion in every product we make. And it all begins with a promise.

The Red Door Promise

The Therma-Tru® Red Door Promise is our commitment to always make a great entrance. We will inspire confidence during your home enhancement process by ensuring reliability and simplicity with beautiful, easy-to-install entry door products.

As the inventors of the fiberglass door, we believe we are uniquely qualified to make this promise. In fact, we believe that because of this promise, choosing Therma-Tru can help make the home enhancement process easy.

In Expert Hands

Therma-Tru® is the trailblazer in manufacturing fiberglass door systems. For more than 25 years, we have studied the science of the entry door and turned our experience into industry-leading innovations. So when you choose Therma-Tru, you can be confident that you are choosing the fiberglass door expert.

The Beauty of Fiberglass

Therma-Tru® works with fiberglass because we discovered that it combined the best characteristics of wood and steel – design and performance – and took them a step beyond.

Therma-Tru fiberglass doors offer thousands of beautiful design options, including multiple glass designs, sidelites, transoms, wood grains and architectural styles. Plus, only Therma-Tru fiberglass is able to replicate the beauty of natural wood with intricate panel detailing and true-to-life wood graining without the environmental concerns of using real wood.

A fiberglass door also offers plenty of strength, as it is made from a material that will not dent or ding like a steel door, nor will it warp, split, crack or rot like wood. It is perfectly suited to provide homes with both weather resistance and security, without ever losing its curb appeal. Therma-Tru is dedicated to excellence in the manufacture of fiberglass doors, because we believe it allows us to create the best possible door systems.

Trust the System

We want to provide you with more than a door. A full Therma-Tru door system enhances entryway

**#1 CHOICE
AMONG
BUILDERS**
ELEVEN YEARS IN A ROW*

performance better than materials from multiple sources.

Therma-Tru door systems are designed to work as a unit for optimal performance and seamless beauty. We design the door along with the frame, jamb, hinges, lock and hardware to create a unified whole. Working together, these components form a seal that provides the best defense against the elements, keeping out harsh weather, wind and rain.

“We make sure every component works together.”

A Therma-Tru door system also helps to enhance security, with a locking system engineered to keep homeowners safe. And by keeping heating and air conditioning sealed in the house, it provides a valuable boost to home energy efficiency.

Finally, with every component coming from one source, a Therma-Tru door system simplifies the ordering process, so that one contact is all you need to design and order the perfect entryway.

Therma-Tru® Door Systems: The Easy, Reliable Choice

Therma-Tru pioneered the fiberglass door because we realized that fiberglass was a material that offered superior design and performance characteristics over wood and steel. By engineering entire door systems, we added a new level of reliability to the home entry door. Today, we continue to bring expertise and innovation to every door we make. That's why building industry professionals and homeowners alike can rely on Therma-Tru to simplify the home enhancement process – and always make a great entrance.

**Beautifully Dependable:
The Therma-Tru® Product Line**

Being the fiberglass door system expert enables Therma-Tru to offer an expansive selection of stylish, reliable door systems. Our knowledge of the technology behind the fiberglass door system is unparalleled, and our innovations consistently meet the demands of the modern homeowner.

For instance, Therma-Tru's AccuGrain™ Technology gives our top-of-the-line Classic-Craft® fiberglass door systems an accurate representation of every detail of the grains, texture and feel of premium woods. Well engineered construction and a Limited Lifetime Warranty make our Classic-Craft brand a first class selection.

And that's just the beginning. Therma-Tru offers hundreds of fiberglass door system options designed to bring design and performance to every dwelling.

Integrity in The Industry

Therma-Tru places great importance on meeting the needs of both homeowners and our industry partners. So we work closely with door distributors, builders and remodelers. We listen to their insights about building trends and homeowner needs, and in turn, we share our knowledge, resources and expertise to help produce the ultimate fiberglass door system solutions for homeowners nationwide.

Maintaining these relationships has taught us the importance of everything from on-time delivery and installation training programs to on-trend designs. This attention to detail is what makes Therma-Tru the most preferred brand in the business. And we believe that our industry reputation is one that homeowners can believe in, too.

The Simple Solution

You have a passion when it comes to home enhancement; we are passionate about meeting our customers' needs. That's why we make our Red Door Promise. It is our commitment to always make a great entrance, and the reason you can believe in Therma-Tru door systems.
